Kokovkin Lev

levkokovkin@gmail.com | +7 916 718 59 24 | GitHub | Kaggle
ML Engineer | Moscow, Russia | Visa sponsorship required

Mathematics and Computer Science student at Central University. Studies mathematics and machine learning. Competes in Kaggle, olympiads and hackathons.

EDUCATION

Central University (CU) Present
Mathematics and Computer Science

- Advanced studies in mathematics and computer science at leading technical university
- Active project work in machine learning and data analysis
- Combining core curriculum with applied mathematics research
- Participation in scientific seminars and engineering workshops

HONORS & AWARDS

DLS ML Olympiad (MIPT) - **3rd / 502 Place** 2025
Olympiad in Mathematics - Kazan Federal University (KFU) - **Prize Winner** 2025
Rosatom Computer Science Olympiad - **Prize Winner** 2026
International AI Olympiad (IOAI) - **Top 7** in the National Selection Round 2026
NEAOAI - **Participant** 2026
2x Kaggle Master - Notebooks and Datasets; reached **Top 93 / 60,807** in Notebooks.
Stanford RNA 3D Folding - **Gold Medal Notebook**; **Top-1 by upvotes** (**444 upvotes**).

RESEARCH

Lexicon Engineering and Gradient Boosting for Plant Pest Relation Extraction
CLEF 2026 / PestCLEF - In-person presentation, Jena, Germany (Sep 2026). Paper

- Built a CPU-only relation-extraction pipeline using a taxonomy-aware lexicon and gradient boosting; **3rd** on the final private leaderboard, **macro-F1 0.43992**.

Restoring the Hidden Degradation Chain: Post-Processing-Aware Training for Robust Synthetic Image Source Attribution
DLMMDD / ICANN 2026 - In-person talk, Padua, Italy (Sep 2026).

- Trained EfficientNetV2-S with 1-3 simulated post-processing operations before resizing; **99.47% public** and **98.67% private** leaderboard accuracy.

EXPERIENCE

ML Engineer at samreshuuu.com March 2026 - Present

- Developing RAG systems, LLM fine-tuning, and AI agents.
- Building ML pipelines and working with production-ready models.

ADDITIONAL ACTIVITIES

- Solving practical tasks on Kaggle
- Competing in maths, computer science Olympiads, and hackathons
- Developing ML project during my studies

SKILLS

Programming	Python, C++, SQL, experience with Linux
Tools	PyTorch, TensorFlow, Scikit-learn, Pandas, NumPy, YOLO, OpenCV, CatBoost, NLTK, Plotly, Matplotlib, Hugging Face Transformers, LoRA, Docker, RAG
AI & Agents	LLM fine-tuning, RL, AI Agents, prompt engineering
